## CAREER OBJECTIVE

Motivated full-stack developer with expertise in Python, JavaScript, and modern frameworks. Skilled in backend API development, database management, and responsive UI design. Eager to apply problem-solving skills to create impactful and scalable digital solutions.

## EDUCATION

Bachelor of Computer Applications (BCA)

East Point College of Higher Education, Bangalore

Graduated: 2025

## TECHNICAL SKILLS

- Languages: Python, JavaScript
- Frontend: HTML5, CSS3, React, Next.js, Tailwind CSS
- Backend: Flask, Django, Node.js, REST API Development
- Databases: MongoDB, MySQL
- Tools: Git, GitHub, Postman, Vercel, Render, Netlify

## PROJECTS

Interview Preparation Platform – React, Next.js, Node.js, MongoDB, Supabase

- Built a responsive web app for aptitude, technical, and HR interview practice with role-based access.
- Developed and integrated secure content management APIs using Node.js and MongoDB.

FinVoice – Voice-Powered Personal Finance Tracker – Flask, Tkinter, SQLite, Pandas, Web Speech API

- Created a desktop application for expense tracking with voice command support and persistent SQLite storage.
- Implemented automated PDF/Excel report generation for financial analysis using Pandas.

Health One – Health Management Platform – Next.js, React, MongoDB

- Designed a secure patient-doctor record management system with role-based authentication.
- Optimized MongoDB queries for faster retrieval and better performance in large datasets.

## STRENGTHS

- Proficient in designing and deploying full-stack web applications.
- Strong problem-solving skills and adaptability in fast-paced environments.
- Effective team player with clear communication abilities.
- Quick learner with a passion for adopting new technologies.

## INTERESTS

- Building innovative web applications and contributing to open-source projects.
- Exploring backend and cloud technologies for scalable solutions.
- Learning emerging trends in AI and automation for software development.
